Home type: <input type="checkbox"/> Existing site-built <input type="checkbox"/> Existing Manufactured: # of Sections <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3			
Section below must be filled out by the installer.			
Total heated area of the home:		sq ft	Installed Date
Existing Heating System Being Replaced: <input type="checkbox"/> Electric forced air w/out AC <input type="checkbox"/> Electric forced air w/AC This measure does not apply if the existing heating system is an air source heat pump, ground source heat pump, natural gas furnace, or electric zonal-including ductless heat pumps.			
Heat pump outdoor compress type: <input type="checkbox"/> Non variable speed <input type="checkbox"/> Variable speed			

Eligibility:

- Available for existing single-family and existing manufactured homes with whole-home centrally ducted system.
- Existing heating system type must be an electric forced air furnace (conversion) to high-efficiency ducted heat pump.
- New heat pumps must be rated as having a HSPF2 and a SEER2 efficiency rating that meets federal minimum standards according to the AHRI Certificate..
- Equipment must be AHRI-tested and certified; manufacturer claims of “equivalent to AHRI certified equipment” will not be accepted.
- Electric Forced Air furnace to Variable Speed Air Source Heat Pump. The outdoor compressor must be variable speed or inverter driven. Documentation must be provided to verify the variable speed or inverter driven compressor.
- At this time, VRF technologies (also known as VRV) do not qualify for the residential conversion from electric forced air furnace to air source heat pump measure.
- PTCS or Prescriptive Duct Sealing may be completed and claimed in additional to this measure; however, duct sealing is not required for completion of this measure.

Documentation to submit with this form:

- Provide Fall River Electric with a copy of the installed air-source heat pump invoice, showing manufacturer and model number.
- AHRI Certificate documenting unit meets current federal minimum efficiency standards.

Measure Category	Member Rebate
Heat pump conversion from electric forced-air furnace to Air-Source Heat Pump	\$ 700.00
Heat pump conversion from electric forced-air furnace to Variable Speed Heat Pump	\$ 850.00
Variable-Speed Air-Source Heat Pump Upgrade	\$100.00

Purchases must be made after 10/1/2023 and installed in FRE service territory to be eligible. All incentives are subject to availability and may change at any time. FRE reserves the right to inspect for program compliance. By signing, the Member certifies that the above information is true and accurate to the best of their knowledge.
