

Agricultural Variable Frequency Drive (VFD)

Addition of adding VFD to existing pump

Existing Turbine and Centrifugal pumps are eligible

Fall River Electric (FRE) provides energy efficiency programs to financially assist our members to improve irrigation system efficiency. This measure requires the addition of VFD to an existing, fixed speed, turbine, or centrifugal style pump. This measure applies to pumping operations that deliver, distribute or transport irrigation water with qualifying VFD's from 7.5 to 1,000 horsepower electric motors. Both Turbine and Centrifugal pumps are eligible with the following conditions: Turbine pumps are eligible with substantial variation in flow rates (20% variation or more) or discharge pressure requirements (10% variation or more). Centrifugal pumps are eligible with substantial variation in discharge pressure requirements (20% variation or more). All VFD installations are required to meet the IEEE 519 harmonics standard.

REBATE

Measure Category	Member Rebate
Turbine Pump VFD	\$70.00 per nameplate horsepower
Centrifugal Pump VFD	\$50.00 per nameplate horsepower

Documents Requirements:

- The invoice showing manufacturer, model number, type or size of equipment, purchase date and cost.

Purchases must be made after 4/1/2023 and installed in FRE service territory to be eligible. All incentives are subject to availability and may change at any time. FRE reserves the right to inspect for program compliance. By signing, the Member certifies that the above information is true and accurate to the best of their knowledge.
